

ANIMAL TRIAGE TRAINING GAME

- FOR FIRST RESPONDERS -

We would like to invite you to take part in the **Animal Triage Training Game** by the ADE Foundation! Through this interactive training, you will learn how to apply the **CVET-ADE triage protocol** in emergency situations where animals are affected.

This training is not designed to test how good you are, but to prepare you for realistic scenarios in which your actions can make a difference.

YOUR OBJECTIVE

Work through the different scenarios and apply the triage protocol to correctly assess and tag animals. You will learn how to use the protocol in emergency situations and determine which animals require urgent care first, without needing in-depth medical knowledge or performing medical procedures. Making mistakes is part of the process; in fact, it's how you learn best.

As you progress, you will become more proficient in applying the protocol, and the levels will become increasingly challenging. You can replay each level until you have achieved enough points to successfully complete the training and download your certificate(s).

WHAT CAN YOU EXPECT?

- Various disaster scenarios involving livestock, horses, and companion animals
- Hands-on experience with the official **CVET-ADE triage protocol**, the new standard for animal triage in emergency situations
- A clear instructional video guiding you step by step through the protocol
- Insights into **normal animal behavior** to help you recognize abnormalities and make faster triage decisions during the training

COMPLETE THE TRAINING AND EARN YOUR CERTIFICATES!

Successfully complete the training and receive your certificate of participation for both **livestock** and **companion animals**. This demonstrates that you understand the triage protocol and can apply it in practice.

READY TO GET STARTED?

Complete your registration via the link below and click the **'Activate your account'** button. If your details are already known to us, you will receive your login credentials by email.
